

The background of the slide is a dense, top-down view of a large pile of discarded plastic waste. The waste includes numerous clear plastic bottles, some with labels, and many crumpled plastic bags. The overall color palette is dominated by various shades of green, from light lime to dark forest green, which is overlaid on the waste. A thin orange horizontal line is visible in the upper left quadrant of the image.

# Overview

Established in 1991, we're an independent supplier of high-quality and sustainably sourced cleaning materials, chemicals, and cleaning machines.

With a core focus on sustainable service delivery, looking after our environment & local communities and product innovation, our mission is to change what you know about managing janitorial product supply and creating a sustainable future that reinvests into communities and the less privileged.

# Organisational

## Sustainability

Wessex is fully committed to sustainable procurement and operational practices.

We support our customers in achieving their goals by meeting any requirements for new products or sustainability objectives.

## Environmental

Continue to grow our environmentally safe product range and act in ways that are kind to the environment by investing in technology, fleet solutions, and operating procedures to drive down our impact on the environment.

## Products

We continue to adapt our product range in such ways that only benefit our clients and their customers.

By listening to feedback, our leadership team product test all new innovations to give them the seal of approval before they are used on client sites.

## Packaging

Wessex arranges deliveries on a per-site basis with human interaction.

We identify items that are heading to the same location and group products that can be delivered together. We also reuse supplier boxes to prevent further waste.

# Our Performance

We have developed a powerful and refined process that allows us to be one of the UK's leading distributors of cleaning and janitorial equipment. Our numbers say it all.

# Machine end of life management

## What is it about?

Wessex is committed to supporting our customers in the furthering of sustainable cleaning practices and promoting a circular economy.

We provide our customers with one less issue to resolve and provide full documentation to demonstrate compliance, ensuring correct treatment in line with most businesses CSR policies are followed.

By recycling your old machines, a waste transfer document will be produced along with a recycling report that will give a raw material breakdown

You will also receive a residue statement of any material that cannot be fully recycled and is used for items such as road ballast and building blocks.

# What happens?

## Where does it go?

The materials collected are certified and documented to ensure green-cycling of product components take place, meaning they are recycled into a new equipment or reused if recycling cannot be achieved.

## What's next?

The components are documented, and distributed to factories that can make use of them. We will then give you recycling report and a residue statement, so you can see where everything goes.

**Why do it?**  
Wessex is committed to sustainable cleaning, and helping customers achieve a zero waste to landfill solution. Recycling your machinery is a big step forward.

## How is it done?

It's simple, old machinery is collected from us and sent to a recycling centre where it is stripped and recycled to make a number of new components.

# The Process

- 1 Let us know what machines that you would like recycling and ship them to us.
- 2 Wessex will arrange the collection, transportation, recycling and reporting.
- 3 When the machines have been evaluated and disassembled, you will receive a recycling report of what has been recycled.
- 4 For what can't be recycled, and a residue report will be given, showing you where these elements go (often used in road ballast and building materials)
- 5 Wessex will send you all reports to demonstrate the circular recycling solution.

# End

Let's work better together -
